

BOTTLED WATERS

Adam's Ale (as water used to be known) is now a very common accompaniment to a meal as its consumption assists the digestion of food and the body's reaction to alcohol. Thirty years ago, it was very rare indeed to see water served unless it had been specially asked for by the customer. Then a jug of tap water would appear with the occasional slice of lemon. We sneered at our French cousins with their obsession for Badoit, Evian or Perrier. But as with so many matters gastronomic, they lead, we follow and sometimes surpass La Belle France. Our local waters have become national and the differences are sometimes the subject of heated discussion. Our selection, we hope, offers you plenty of choice without being too ostentatious.

BOTTLED WATER

Abbey Well

Abbey Well's natural mineral water has been filtered through white sandstone for at least 3000 years. It comes from a single naturally protected source in the unspoilt county of Northumberland.

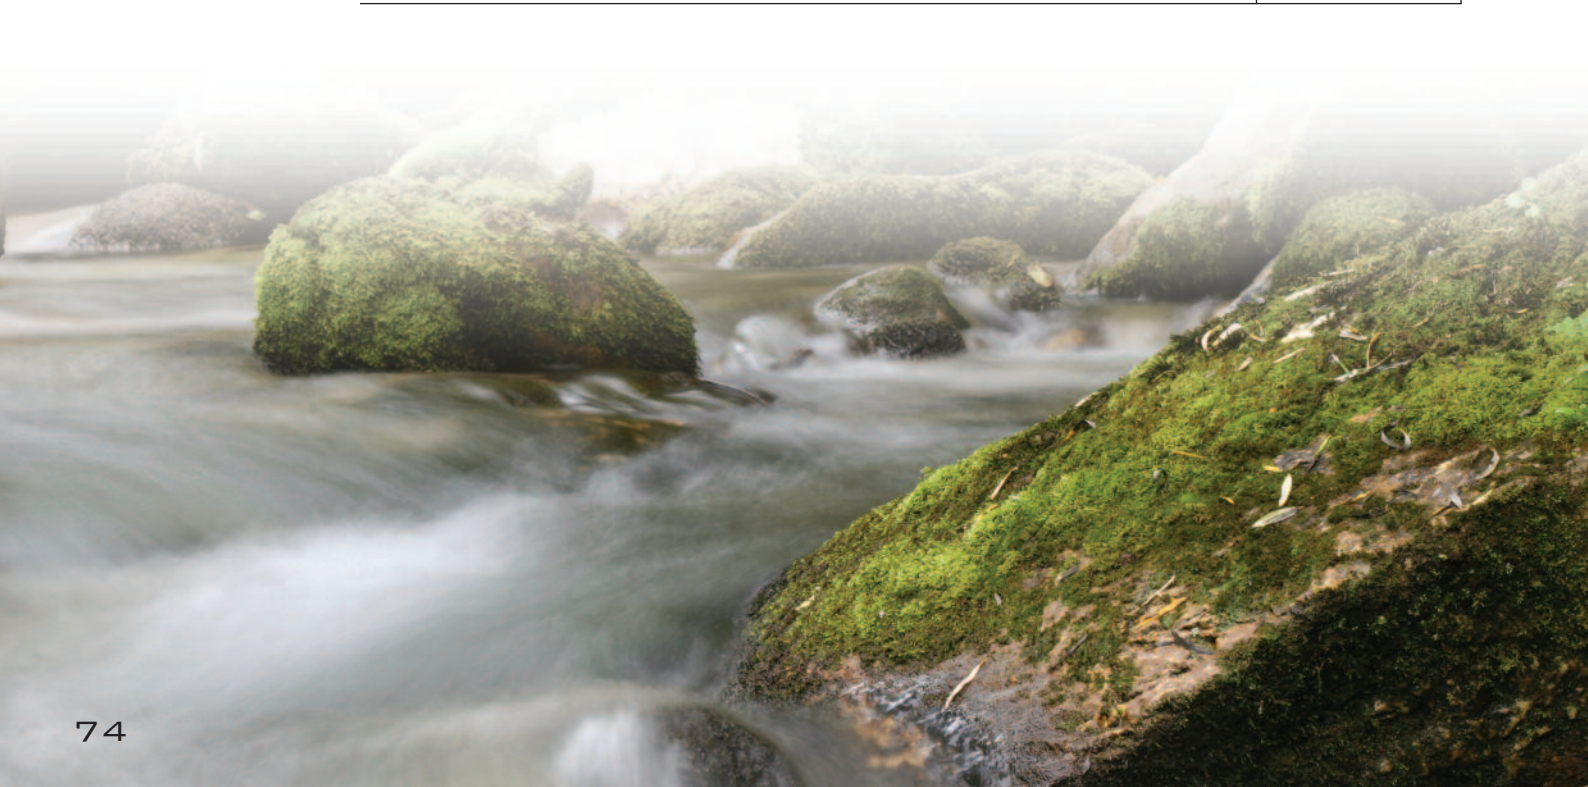

Abbey Well Still

Abbey Well Sparkling

<p>Acqua Panna (Italy) Established in 1927, Acqua Panna takes its name from the famous Villa Panna in the hills of Tuscany, where the water was first discovered.</p> <p>Acqua Panna Still</p>	<p>Pack Size</p> <p>24 x 500ml 12 x 750ml</p>
<p>Harrogate Spring Water Harrogate Spring Water is sourced from water-bearing rocks near the centre of Harrogate town, 45 metres below the ground. It is renowned for being low in sodium, having a well-balanced mineral content and a slightly sweet flavour. The sparkling water is only lightly carbonated – meaning it can be drunk comfortably in large quantities and goes well with any type of food.</p> <p>Harrogate Spring Still</p> <p>Harrogate Spring Sparkling</p>	<p>24 x 330ml 12 x 750ml</p> <p>24 x 330ml 12 x 750ml</p>
<p>San Pellegrino (Italy) The No. 1 premium sparkling mineral water in the U.K. by value, San Pellegrino is a carbonated mineral water, produced and bottled at San Pellegrino Terme, near Milan, Italy. The water originates from a layer of rock 1,300 ft (400 m) below the surface, where it is mineralized from contact with limestone and volcanic rocks. It emerges from three deep springs at a temperature of about 70°F (22°C).</p> <p>San Pellegrino Sparkling</p>	<p>24 x 500ml 12 x 750ml</p>
<p>Strathmore The water comes from a well, bored through 400 million year old sandstone. It gets there by falling as rainfall on the hills and vales of Strathmore located in the Royal Burgh of Forfar on the east coast of Scotland. This eventually filters down into an aquifer, which runs all the way under the North Sea from Scotland to Norway. This whole process takes an incredible 50 years.</p> <p>Strathmore Still</p> <p>Strathmore Sparkling</p>	<p>24 x 330ml 12 x 1 litre</p> <p>24 x 330ml 12 x 1 litre</p>
<p>Willow Cool, crisp and refreshing Willow rises to the surface in the southern Lake District. It can trace its roots back to the 12th century when it was discovered by Augustinian Monks.</p> <p>Willow Still</p> <p>Willow Sparkling</p>	<p>12 x 250ml 6 x 750ml</p> <p>12 x 250ml 6 x 750ml</p>
